Weems & Plath Offers the LightWedge Night Vision Reading Light

The LightWedge night vision reading light is perfect if you need to read your chart or make log entries but also need to preserve your night vision at the helm of your yacht. The elegant, simple design of this night light features a patented technology that uses LED's and a tapered, "wedgeshape" lens that directs all the light down on the chart being read. The distortion-free optical-grade acrylic lens reflects red LED edge light onto the page or chart, not into your eyes. There are two light settings. The simple push of a button adjusts the light from bright to dim to off.

There are no bulbs to burn out. Four AAA batteries (not included) provide 40 hours of light, and they can be easily replaced. The one touch operation on-off switch allows you to conserve battery life when not in use. The LightWedge illuminates your charts, maps and books with ease. It is light and easy to handle and pack.

Item # NV100, LightWedge has a Suggested Retail Price of \$40.00

Dimensions: 9 1/4" High x 6 3/4" Wide

Weight 8.5 oz. (with batteries)
