## Weems & Plath's Endurance Collection Expands and Endures a Rugged Test at Sea

Weems & Plath has received an overwhelming response to the revolutionary new **Endurance Collection**. True to its name, this new product was recently put to the test aboard the Weems & Plath vessel, Bee Weems. Mounted horizontally to the roof of the down east cruiser and facing the heavens for the 3,000 mile journey from the Chesapeake, down the Intracoastal Waterway to the Bahamas and back to the Chesapeake, the Endurance brass comfortmeter was subjected to all kinds of weather and sea conditions and endured.

Upon inspection under a microscope no imperfections were found. The finish was pristine and free from any effects of the harsh marine environment. In contrast, the wood plaque the instrument was mounted to was cracked, peeling and discolored.

Originally introduced in a brass finish, this collection now features two new stunning finishes, Chrome and Black Pearl. It also has added two new instruments to the collection: a time and tide clock and an inclinometer.

Imagine purchasing an instrument for your boat that will never tarnish. For the first time ever, a solution has been found to the problem every boater makes when the harsh marine environment eats away at an instrument's finish. Weems & Plath has diligently worked to resolve

this problem using new technology to offer permanent solutions.

This expansive collection features five remarkable benefits never before available in an instrument collection.

#### **Endurance Features:**

1. The **Endurance** finish will never tarnish or corrode so it is maintenance free!
2. **Endurance** is weatherproof and designed to be used outdoors.
3. **Endurance** features the new **Weems Slide 'n Lock Mounting System** with no visible mounting screws that allows for easy removal for adjustments, storage and security
4. **Endurance** includes 4 instrument sizes that will fit in any space configuration
5. **Endurance** instruments feature a lifetime warranty on finish and movements

The instruments may not look revolutionary at first, but when left out in the elements it becomes apparent why the collection is called **Endurance**. No matter what the conditions, they will always look like new. The brass case of each instrument is coated with an ultra-hard mirror finish that stands up to tough outdoor conditions. They never need polishing or refinishing. Weems & Plath is so sure about the long lasting durability of this finish, that they offer a lifetime warranty on not just the movement inside but also on the finish of the instrument.

In addition to the durable finish, another feature that makes the **Endurance Collection** the best choice for use in the marine environment is the fact that it is weatherproof. The beveled glass crystal creates an elegant look of quality and style, while a silicone o-ring seated behind the crystal protects the front of the instrument from water and contaminants.

The next exciting feature that is also offered for the first time is a unique mounting system developed by Weems & Plath called the **Weems Slide 'n Lock Mounting System**. This simple to use system locks instruments in place, yet allows easy removal for adjustments, battery changes, storage or security. The instrument can be lifted off its mounting plate without having to remove the screws that secure it to the wall or bulkhead of the boat. A unique dovetail design on the backside of the instrument slides over the mounting plate and locks into place so that no mounting screws are in view.

Finally, **Endurance** is available in four sizes so that the appropriate size can be selected to fit in any space configuration on a boat or wall. They can also be mixed and matched. Each size currently includes 5 instruments – a quartz clock, a barometer, a comfortmeter (measures temperature and humidity) and the new time & tide clock and inclinometer. **There is a Lifetime Warranty on both the finish and the movement of every instrument!**

The **Weems & Plath Endurance Collection** is the solution to every boater's desire for a beautifully styled, easy to use, and maintenance free instrument. Endurance is the perfect solution for the boat, home, or office.

#### **Endurance Series Dimensions:**

# 85: Dimensions – dial 3-3/8” diameter, base 4-1/8”, depth 1-1/2”

#125: Dimensions – dial 4-7/8” diameter, base 6”, depth 1-5/8”

#145: Dimensions – dial 5-3/4” diameter, base 7-1/7”, depth 1-7/8”

#175: Dimensions – dial 6-7/8” diameter, base 8-1/4”, depth 2-18”
