## Weems & Plath Introduces ROADrule®

ROADrule® USATONS (#290) identifies the most common U.S. aids to navigation, rules of the road, and maneuvering and warning signals for U.S. waters. This simple to use identification tool shows the actual view of maritime buoyage systems with corresponding chart symbols. It describes bridge lighting and Intracoastal Waterway markings. ROADrule® takes a large amount of complex information and makes it easy to understand and quick to refer to. Whether in a classroom or at the helm, critical decisions can be made quickly and with confidence with the aid of ROADrule®.

ROADrule® is constructed of durable two-sided black PVC. Its design is similar to a slide-rule. The various buoyage markers are drawn in color to match the chart symbol. This quick reference tool is a great value, is stored in a vinyl sleeve and fits nicely in a chart table. Dimensions: 16" x 5 1/4".

ROADrule® complements the recently introduced LIGHTrule® COLREGS that has become an instant success. We have also expanded the line to include three additional recognition tools and study aids that cover European inland Canals and International Waters. For more information on these, please contact Weems & Plath.

Item #290 ROADrule® USATONS has a Suggested Retail Price of \$25.00.
