Weems & Plath Introduces the Improved Chartkit Plotter

This affordable and portable navigation system is designed for quick and accurate navigating with any chart, chart kit or chart book, including Admiralty and Imray Chartbooks. The plotter is constructed of a solid wood frame with a rugged plastic center that incorporates an adjustable plotting arm fitted with a rotating compass rose. (This arm can also be ordered separately to be used at any navigation station.) This system enables easy plotting of compass courses. It also firmly supports and protects charts as they fit snugly in the base with a plastic overlay. Its portability makes it perfect for plotting a course at home, aboard your boat, or bringing on your holiday charter boat. Set the plotter's compass rose for true or magnetic north, then plot a course to a given point by aligning the rule with the intended course. The rule overlays the course on the rose allowing you to quickly determine the correct compass course to steer. Distances can also be calculated using the scales provided on the rule.

A see-through acrylic sheet overlays and protects the chart as you plot and allows for notations using the four colored dry erase markers that are provided. A tough custom black nylon carrying case is included, and charts can be stored in the case along with the plotter.

Weight: 7lbs or 3.175kg Dimensions: 24 3/16"W x 20 3/16"H or 61cm x 50.8cm

Item #122, The Chartkit Plotter has a Suggested Retail Price of \$110.00USD.
