## Weems & Plath's LIGHTrule CEVNI

The European Inland Waterways have a unique system of lights for vessel identification called CEVNI. This simple to use vessel identification tool shows the actual view of vessels for Port, Starboard, Bow and Stern lights on European Inland Waterways. The right bank or right-hand side of the channel and the left bank or left-hand side of the channel are seen from the perspective of an observer facing downstream (downhill on a canal).

**LIGHTrule® CEVNI** identifies 53 light configurations and provides a magnifying lens to make vessel descriptions easy to read. It also displays Sound Signals for restricted visibility, manoeuvring and warning.

**LIGHTrule® CEVNI** is inexpensive security for night travel and should be an essential part of the equipment found on any boat traveling on European Inland Waterways. It's a great value, constructed of extremely durable plastic and stored in a vinyl sleeve.

Dimensions: 15 1/2" x 5 1/8" or 393.7mm x 133.35mm    Weight: .45lbs or 204.1g

Item #191 **LIGHTrule® CEVNI** has a Suggested Retail Price of \$25.00USD
