Weems & Plath Introduces ROADrule CEVNI

ROADrule® CEVNI identifies the most common aids to navigation, rules of the road, and maneuvering and warning signals for European Inland waterways. This simple to use identification tool shows the actual view of maritime buoyage systems with corresponding chart symbols. It describes bridge lighting and traffic lights and signals for waterways. ROADrule® CEVNI takes a large amount of complex information and makes it easy to understand and quick to refer to. Whether in a classroom or at the helm, critical decisions can be made quickly and with confidence with the aid of ROADrule® CEVNI.

ROADrule® CEVNI is constructed of durable two-sided black PVC. Its design is similar to a slide-rule. The various buoyage markers are drawn in color to match the chart symbol. This quick reference tool is a great value, is stored in a vinyl sleeve and fits nicely in a chart table.

To complement the ROADrule® CEVNI, Weems & Plath has also introduced LIGHTrule® CEVNI which identifies light configurations in European Inland Waterways. Rules for U.S. waters and International waters are also available. For more information on these, please contact Weems & Plath.

Dimensions: 16" x 5 ¼" or 406.4mm x 133.35mm. Weight: .45lbs or 204.1g

Item #291 ROADrule® CEVNI has a Suggested Retail Price of \$25.00 USD.
