 ⊙ Can be connected.
 ⊙ Only when the Brass Extender & Kinetic Wind Vane are also connected.
 * Requires either the JGM1LFB Ground Mount or JM1LFB Wall/Post Mount to be installed.

FULL RANGE OF COMPATIBLE JEFFERSONIAN PRODUCTS

#VRG7-2LFB 2ND GENERATION RAIN GAUGE - Uses a float and lever design to measure up to 7" of rain in 2/10" increments. As water fills the vial, the red ball rises, causing the steel arm to climb the scale.

#WV2LFB KINETIC WIND VANE MODULE - As the wind increases, the aluminum cups sweep around the wind vane, causing the arms to rise and point to the relative wind speed indicated in illustrations on the brass arrow below.

#T27LFB DRUM THERMOMETER - As the temperature changes, the brass drum slowly turns until the appropriate degree of temperature (shown in Fahrenheit) aligns with the aluminum arrow. (#T27CLFB Drum Thermometer in Celsius also available.)

#JCD1LFB CARDINAL DIRECTIONS ACCESSORY - Solid brass accessory for the Kinetic Wind Vane (#WV1LFB) to indicate which direction the wind is blowing.

#JM1LFB WALL/POST MOUNT - Perpendicular steel mount for securing one or more of the above Jeffersonian products to any fence, post, deck, or wall.

#JGM1LFB GROUND MOUNT - Vertical steel mount for securing one or more of the above Jeffersonian products in the ground or garden, or on a deck or patio.
